CURRENT FOCUS

- 2026-ready AI-integrated business systems
- Agentic workflow design
- SME operational automation
- Customer intake systems
- Quotation and status tracking
- Production workflow visibility
- Practical AI-assisted software development

EXECUTIVE SUMMARY

AI-integrated systems builder with a background in full-stack development, SharePoint and Power Platform automation, workflow systems, and operational problem-solving. Experienced in designing practical AI-assisted business systems that combine LLM tooling, agentic development workflows, cloud infrastructure, CRM-style operational flows, customer intake, quotation/status tracking, and production-ready web systems. Strong foundation in real-world enterprise systems execution, legacy system support, front-end engineering, and operations management. Focused on turning business ambiguity into clear workflow states, usable interfaces, customer visibility, and scalable operational processes.

CORE COMPETENCIES

LLM Integration & AI Workflow
Orchestration

Agentic Workflow Design

AI-assisted coding, debugging &
prototyping

Next.js / React / TypeScript / JavaScript

Supabase / PostgreSQL / SQL Server

Vercel / Firebase / GCP / Cloudflare R2

LINE Messaging API / LIFF / MINI App
flows

REST APIs / Webhooks / Signed URLs

SharePoint 2019 / Power Automate /
Power Apps

CRM workflows, intake, quote/status
tracking

Git / Cursor / GitHub Copilot / Codex

STRENGTHS

AI-Driven Thinking

Uses AI to improve decision quality, not just speed.

Systems Builder

Designs and ships real operational systems end-to-end.

Ambiguity to Clarity

Turns unclear business needs into workflow states.

Stakeholder Bridge

Communicates across technical and non-technical teams.

Practical Execution

Grounded in real operational and business experience.

EXPERIENCE

Independent AI Systems Developer & Consultant

Independent

- Design AI-assisted operational systems and workflow platforms for small businesses and production environments.
- Build LINE + LIFF based customer intake and quotation workflow systems integrated with Supabase and Vercel.
- Design CRM and workflow foundations for customer intake, quote visibility, payment/commercial gates, production status tracking, and operator handoff.
- Develop scalable file and asset handling strategies using signed URLs and cloud object storage.
- Apply AI-assisted development workflows using ChatGPT, Codex, Claude, Gemini, Cursor, and GitHub Copilot.
- Design practical AI features as assistive workflow layers.
- Explore agentic AI workflows and orchestration patterns for future production automation systems.

AI-Assisted Problem Solver / AI & Tech Integrator

Independent / AK3 Studio

- Use AI as a reasoning partner for research-driven problem analysis and decision support.
- Clarify ambiguous business problems and translate insights into practical execution.
- Improve operational efficiency and long-term business value for SMEs.
- Transform unclear requirements into workflow structures and execution-ready solutions.

IT Programmer / SharePoint & Nov 2022 - Nov 2025

Power Platform Developer

C.C.S. Advance Tech Co., Ltd.

- Developed and maintained enterprise systems on SharePoint 2019 On-Premise.
- Automated workflows using Power Automate.
- Built custom forms and interfaces using JavaScript, jQuery, HTML, and CSS.
- Integrated SharePoint lists, legacy data, and business requirements.
- Collaborated with cross-functional teams.

Front-End Developer

Nov 2021 - Jul 2022

Absolute Solution Co., Ltd.

- Developed user interfaces using React, Next.js, Ant Design, and Material UI.
- Integrated REST APIs.
- Participated in Agile workflows.

Operations Manager

Oct 2018 - Dec 2020

Frozen Restaurant

- Managed daily operations, staff coordination, and resource planning.
- Improved operational workflows and team performance.
- Gained hands-on decision-making experience.

Junior .NET Developer

Oct 2015 - Feb 2018

Auction Trade Co., Ltd.

- Developed internal systems using C#, .NET Framework, and SQL Server.
- Fixed bugs and optimized legacy systems.
- Supported database operations and maintenance.

Graphic Designer

Dec 2013 - Dec 2014

Manta Performing Arts

- Created visual assets, branding materials, and stage graphics.
- Built foundations in visual communication and creative thinking.

EDUCATION

Data Analysis with Power BI

2024 - Present

AskMe Solutions

SCADA Systems for Production Processes

2024 - Present

Rajamangala University of Technology Phra Nakhon

Full-Stack JavaScript Web Development (CodeCamp #9)

2021

Software Park Thailand

Intensive 6-month bootcamp covering React, UX/UI, Node.js, MySQL, and backend fundamentals.

Undergraduate Coursework

2013

Chandrakasem Rajabhat University

Programming, algorithms, databases, and system fundamentals.

Vocational Certificate in Electrical & Electronics

2010

Tak Technical College

Electronic circuits, electrical systems, and digital/analog fundamentals.
