CURRENT FOCUS

- Enterprise and ERP workflow systems
- Microsoft Dynamics 365 Business Central (currently learning)
- SME operational automation
- Customer intake systems
- Quotation and status tracking
- Production workflow visibility
- Practical AI-assisted software development

EXECUTIVE SUMMARY

AI-integrated systems builder with a background in full-stack development, SharePoint and Power Platform automation, workflow systems, and operational problem-solving. Experienced in developing enterprise and business workflow systems, integrating legacy data, and turning operational requirements into practical software. Current work includes CRM-style flows, customer intake, quotation and status tracking, cloud infrastructure, and AI-assisted development. Currently expanding knowledge of Microsoft Dynamics 365 Business Central, with a focus on ERP operations, inventory, purchasing, sales, service, and workflow integration.

CORE COMPETENCIES

- Business Process Analysis / ERP Workflows / System Integration
- LLM Integration & AI Workflow Orchestration
- Agentic Workflow Design
- AI-assisted coding, debugging & prototyping
- Next.js / React / TypeScript / JavaScript
- Supabase / PostgreSQL / SQL Server
- Vercel / Firebase / GCP / Cloudflare R2
- LINE Messaging API / LIFF / MINI App flows
- REST APIs / Webhooks / Signed URLs
- SharePoint 2019 / Power Automate / Power Apps
- CRM workflows, intake, quote/status tracking
- Git / Cursor / GitHub Copilot / Codex

EXPERIENCE

Independent AI Systems Developer & Consultant
2026 - Present

Independent

- Design AI-assisted operational systems and workflow platforms for small businesses and production environments.
- Build LINE + LIFF based customer intake and quotation workflow systems integrated with Supabase and Vercel.
- Design CRM and workflow foundations for customer intake, quote visibility, payment/commercial gates, production status tracking, and operator handoff.
- Develop scalable file and asset handling strategies using signed URLs and cloud object storage.
- Apply AI-assisted development workflows using ChatGPT, Codex, Claude, Gemini, Cursor, and GitHub Copilot.
- Design practical AI features as assistive workflow layers.
- Explore agentic AI workflows and orchestration patterns for future production automation systems.

AI-Assisted Problem Solver / AI & Tech Integrator
2025 - 2026

Independent / AK3 Studio

- Use AI as a reasoning partner for research-driven problem analysis and decision support.
- Clarify ambiguous business problems and translate insights into practical execution.
- Improve operational efficiency and long-term business value for SMEs.
- Transform unclear requirements into workflow structures and execution-ready solutions.

STRENGTHS

AI-Driven Thinking

Uses AI to improve decision quality, not just speed.

Systems Builder

Designs and ships real operational systems end-to-end.

Ambiguity to Clarity

Turns unclear business needs into workflow states.

Stakeholder Bridge

Communicates across technical and non-technical teams.

Practical Execution

Grounded in real operational and business experience.

IT Programmer / SharePoint & Power Platform Developer

Nov 2022 - Nov 2025

C.C.S. Advance Tech Co., Ltd.

- Developed and maintained enterprise systems on SharePoint 2019 On-Premise.
- Automated workflows using Power Automate.
- Built custom forms and interfaces using JavaScript, jQuery, HTML, and CSS.
- Gathered business requirements and integrated SharePoint lists with legacy data and operational workflows.
- Collaborated with cross-functional teams.

Front-End Developer

Nov 2021 - Jul 2022

Absolute Solution Co., Ltd.

- Developed user interfaces using React, Next.js, Ant Design, and Material UI.
- Integrated REST APIs.
- Participated in Agile workflows.

Operations Manager

Oct 2018 - Dec 2020

Frozen Restaurant

- Managed daily operations, staff coordination, and resource planning.
- Improved operational workflows and team performance.
- Gained hands-on decision-making experience.

Junior .NET Developer

Oct 2015 - Feb 2018

Auction Trade Co., Ltd.

- Developed internal systems using C#, .NET Framework, and SQL Server.
- Fixed bugs and optimized legacy systems.
- Supported database operations and maintenance.

Graphic Designer Dec 2013 - Dec 2014

Manta Performing Arts

- Created visual assets, branding materials, and stage graphics.
- Built foundations in visual communication and creative thinking.

EDUCATION

Data Analysis with Power BI 2024 - Present

AskMe Solutions

SCADA Systems for Production Processes 2024 - Present

Rajamangala University of Technology Phra Nakhon

Full-Stack JavaScript Web Development (CodeCamp #9) 2021

Software Park Thailand

Intensive 6-month bootcamp covering React, UX/UI, Node.js, MySQL, and backend fundamentals.

Undergraduate Coursework 2013

Chandrakasem Rajabhat University

Programming, algorithms, databases, and system fundamentals.

Vocational Certificate in Electrical & Electronics 2010

Tak Technical College

Electronic circuits, electrical systems, and digital/analog fundamentals.
